CAN'T DO WITHOUT IT

Nora, ind., May 3, 1913. Dear Editor:

I am gled that you sent me n reminder that my subscription had expired. It saved me lots of trouble and enclose amount for renewel.

I would be lost without The Citizen. om a former student of Berea and am always giad to hear from there. I think of 'my school days with many sweet memories.

Very truly yours, Salile Wilson.

CARING FOR ANIMALS

On our agricultural page, this week, will be found an interesting article on the prevention of contagious discases among animula.

This is an interesting subject and our readers will be glad to know of the work being done by the state to mave stock.

For this work the state is to be commended. Our only regret is that so little can be shown by comparison that is being done for the conservation of health among human beings.

SHOULD GROW FRUIT

Another interesting article on page 7 is one showing that the state spends seventeen milition dollars for foreign grown fruit each year, and pleading for the checking of this drain upon our resources by giving attention to fruit mising in the state.

PAGE TWO

On page 2, in our editorial columns, will be found an interesting tribute to the country woman, she being called the sait of the earth.

Other interesting articles will be found in these columns.

THE CITIZEN FOR NEWS

We are being told that The Citizen is unequalled for its presentation of the news of the week-the reni the constitutionality of the measure news, It comes, of course, in a condensed form and enited; that is, unimportant events, of which so many papers are full in the exclusion of practically everything that is good, are left out. Readers of The Citizen can be assured that when they have perused its columns there is really nothing of importance that has transpired upon the giobe during the past week with which they are unacquainted.

SPECIAL POEM

SO WE MUST SOW

it is commonly said that we shall reap as we sow, but it is just as true that we reep, if we do not saw- we reap weeds, and briers,

There is a finitage of neglect and laziness just as bountiful of ile kind as there is of industry and thrift. Just es bountiful? It is e hundred fold more bountiful.

il takes no effort to get weeds to grow, but il costs great effort to keep them from growing or to kill them. And so with flies. We are at no expense in their breeding, but they are our most costly erop, when measured by the toll of disesse and death that they exact.

So we must sow. The best way to prevent weeds - to kill weeds-is to sow grass or grain; and the best way to lessen the crop of flies, and disease, and death is to sow-scatter flower seeds, not filth; lies do not like flowers—som health conditions.

We ere now et seed time, but we can enticipate the harvesl. "Men do not gather grapes of thorns, nor figs of thistles." shall reap as we have sown"—and as we have not sown.

" 'CAUSE TH' TEAMS AIN'T MATCHED."

"Offic and Sammy rode away together, up the green arched rosil, and the little company in the mill shed stood watching them. As the finely formed young women and her inferior escort passed from sight, a tall mountaineer, from the other side of Compton Ridge, remarked, "I done heard Preaching' Bill say t'other day, that 'mighty nigh all this here gee hawin', halkin', and kickin' 'monget th' married folks comes 'cause th' teams sin't metched up right.' Bill he 'lowed God 'lmighty'd fixed hit somehow so th' birds an' varminta don't make no mistake, but left hit plumb easy for men en' women t' make blamed fools o' theirselves."

Everybody grinned in appreciation, and another spoke up: "According t' lhat, I'll bet four bits if them Iwo yonder ever do get iuto double harness, there'll be pieces o' lk' outfit strung from th' person's clean t' th' huryln' ground."

- The Shepherd of the Hills

Circut deeds were given us for gallant daring: Great griefs were given us for patient bearing; Great thoughts were given us for gracious sharing. Should I be coward when the great deed calls me, Should I be weak when sorrow's weight appals me, Should I be miser with the great thought's gold, Then for my frailty is my birthright sold.

-Southern Agriculturist.

NAMING THE BABY

Give the haby a name sultable for a buman being, and not for a mure plaything, a kitten or puppy. 100 not treat the young immortal as a joke. No namo like Bahe or Bud or Pussy or Major will belp the boy or girl toward manbood or womanhood.

There are the good old Bible names, and the names of great men and women whom we admire, and the names of our ancestors of whom we may be proud. Such a name may be a real gift, a true endowment to a baby at i the very start.

"THE SALT OF THE EARTH "

"The country woman is, from her environment, the possessor of a resource at once so intelligent and rapable that it behooves those who observe it to admire. She can blich the horse to the huggy, and drive him, too; she can round up the cows that have broken thru the pasture fence, and mend the fence; she can put out the fire in the chimney when the men-folks are far affeld: she caa administer first-aid treatment of the very best to bad burns or cuts or broken arms; as well as such minor lils as hernet stings, chilbiains and stone bruises; she is ant to be a pretty shrewd judge of cattle; sbe can make and meud her own and her children's clotbes; she knows how to cure meat, to shoot a marauding be. If you are able to speak or to sing hawk, to prune a roesbush, to make or to paint or to write or to build you soap, to beat a carpet, to scale a fish-aad she looks on none of these things as an 'adventure' or a unique

"Because she lives with the actualuadue emphasis upon its non-essentals. Comfort, aeatness and cleanliness. above style, are desired in her home, Her table is supplied with palatable and wbolesome food, neatly served. She does not worry about the lack of lace centerpieces, or monogrammed ilnen, or the position of the knives and forks; she knows that if she is comfortably dressed in neat, cleau clothes befltting the occupatiou ia hand and sultable to the weather she is truly a well-dressed woman. She asks, 'Will It wear weli?' when she goes to huy, and she is a very astuti: purchasing agent, keen at a bargain. knowing exactly what she wanta and what she wants to pay for it.

"There is just one phrase that fits her-'sait of the earth.' Let us by all means put her la a class apart and yleid her the respect due ber."-Woman's Home Companion.

A SCHOOL SAVINGS BANK

The most distinctive savinga bank in the world is not a national bank or a Bank of Eagland, but a little sarings bank la one of the public acbools in Cincianati.. Under the guidance of Miss Saille Webb, the teacher, over chained and clamped restrictions" ilma thousand little children are saving their small change which formerly was spont recklessly for sweets and trinketa from veuders who gather in froat of the school building and reap a barvest of amail coins from the children.

This pish of allowing the children to deposit their small change in this cause they shrink from the pang of unique savinga hank was tried out in one of the grades last winter, and it proved so successful that the savlngs bank was formally opened to the whole school at the beginning of the present school term. The first week brought in over \$150 to the credit of the scholars, and two assistants had to be called upon to belp take care of the many deposita,

The children make the deposits before school, at noon and after school. So eager are the depositors to place their coins in saving that a long line always forms right after school is dismissed. Several of the older scholars

have quite a savings account to their credit. After it reaches a certain amount the sum is taken out of the school savings bank and placed to the child's credit in a regular savings bank where It begins to draw three per cent interest. Hazel Balifwin, sged six years, is the bank's youngest depositor,-Christian Heraid.

ELECTRIC SPARKS

Secretary Bryan is the winged Mercury of the administration.

Pres. Wilson refers applicants to other people in a way that makes the third person almost as consplenous as the first person used to be.

Why couldn't Austria llungary hnv vindicated her military preatlage while the Turks were still behind Scutaria's walls.

Today's fallure may mean tomorrow's success.

HOW MUCH? What do you owe your world?

Certainly you owe as much as has been given you, if not more. If the world bas given you much you owe much, if little you owe that little.

Nature bas eadowed you with some gift or grace or talent. You were given your talent to serve your day and generation.

To lilustrate: Edison was born with a gealus for invention. Thisk you that geaius was given bim for seifish uses, merely to make money?

Certainly not. Primarily Edisoa Inveats for the soclal benefit of this world. Incidentally he makes money. But bis best reward comes in other ways than money. It

comes la-The loy of invention. In the satisfaction of doing a social

service. And in the esteem and favor of those wbom he serves.

Or-A woman like Melba or Nordica is born with a gift of song. She cultivates her voice and delights vast audlences and wlas a fortune. But her best reward is in the delight of the song Itseif, la the pleasure she gives, la the appreciation of ber pahile. She is paying her deht.

The composer of a sweet song, the pnlater of a great picture, the architect of a fine temple, the publicist wbo serves the public-money to these is the least of their reward.

One is born with the gift of a great love for his fellows, n geulus for sympathy and good cheer. By his large and aoble snture be strengthens the spirits of iaeu and women and childrea wbo come to him.

He pays his debt hy glvlng himseif

How much do you owe? You owe what you are able to do and must give to that one thing the best that is in you

If you are able to sympathize and belp, to encourage and cheer, even in experience, but simply as part of a small way, you owe your world that

Where much is given much is rela required

Are you paying your debt?

POWER.

i have learned that every appetita except the appelite for duly must be subdued and anchained and clamped to that utmost restriction if you would have suc-come come to you.—David Belasco.

Not long ago I stood on the banks of the Mississippi, near Keokuk, where the glaut dam, costing several million dollars, is belag completed.

The work is second only to that of the l'anama canal, and when the waters are baraessed thousnads of horse power will be utilized.

Looking at the army of men, the great dredges nad craaes and the locomotives, and thinking of the expeaditure of money and labor and nervous energy, one naturally asks. Why?

Power! And what is power? Nobody knowa. The engineers know how to get it, but they do not know what It la.

flow do they get lt?

By restricting the flow of the wniers. The electrical forces are generated by plling up the waters and pouriag them onto a turbine lieft free, the power escapes.

It is so with tumans.

They get power only by restricting themselves. He who by "aubdued, enits himself, denies himself, becomes powerful.

There is no other way.

The difficult way is the successful way. You pay the price of selfhood by dearying self

If only the young rould nee this! They want the easy way. They choose the line of least resistance be-

dulgence and tassitude and the attnshine way Only that is worth white which is

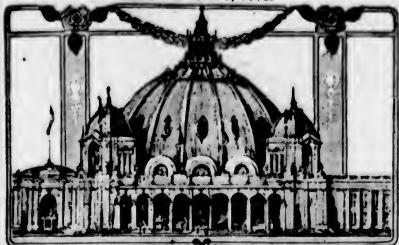

self sacrifice. They want case and in-

hard to get. When some poor youth struggles up ward to success we are aurprised, when as a matter of fact we should expect it. Having the way to make, the poor youth restricts every appetite but that of duty, and he develops power, char acter, survesa.

Do you want power?

It must come through hardship and self denial, by subduing unwholesome appetites, by restricting yourself to your one chosen field of endeavor. Power comes by restraint.

Copyright, 1918, by Panama-Pacific International Exposition ESTIVAL HALL, where the conventions of the world will meat in 1918. The building will be 380x200 feet, with grentent breadth of 280 feet, the latter being taken up by the wings. A vast auditorium with a buge stage will be a feature of the structure

WILLIAM M'KINLE /.

The tweuty-fifth president of the l'atted States was a native of Nice, O. born in 1843. Mr. McKinley was the twenty fourth man to hold the office, but la called the twenty-fifth president because Mr. Pleveland, having been elected the second time after an interim, is known as the twenty second and twenty-fourth president. McKinley rose to the rank of major in the civil war, He became a lawyar, served several terms in congress with conspictions ability and was elected governor of Ohio in 1891 and again in 1893. He defeated William J. Bryan for the presidency in 1896 and them. Fresident McKinley was assassinated by Leon Uzolgosz at Buffalo, N. Y., Sept. 8, 1901.

DEVIL WOULD TEACH THE DOC- bread alone. TRINE THAT LIFE CAN BE SUS-TAINED IN ONLY ONE WAY.

I is the time of the triple temptation in the wilderness. The coa versation is between Christ and Satan. One great in goodness, the other great in evil device. Three temptations are hurled in quick succession and as quickly parried and repulsed. Make bread from these stoaes. Cast thyself down from the pinnacle of the temple; wornhip the devil. Mark the audacity of Sataabe would attack the Son of God, be would storm the cltadel of heaven. If the devil would persistently attack the wisent, noblest and best of earth. think not you will be free. We hear him saying, "Make bread out of these

atones. The devil would teach the doctrine that life can he sustained in only one way: Ills program is to cat and live; take plenty of bread and refuse to die. Fill the cupboard and the cribs: let the harns hurst with the golden grain; thea boast thynelf of tomorrow. Say to thynelf: "Soul, thou bant much goods laid up for many years; eat, drink and he merry." That is the devll's program. It is lngersoll saying, "One world at a time, one life at a time." The man who ilstean to that

argument is listening to materialism. With a quick flash came the words, 'Man shall not live by bread alone. It is not necessary that we live at all; but, anyway, we are not confined to one method of subsistence. Only in the most sarrow and contracted nense do we live simply because we baked a loaf and ate It, but because

God wills that we live. ia Barn Too Large?

flut thia is evidently a blow at materlalism. We bear much these later days as to our accomplishmeata. So many farms tilled and lands opened up; so many millions of bushels of wheat and corn; ao many halen of cotton; so many mlles of railroad built, and so many sbips set affoat on the bigh seas. This may be interesting from the point of statistics. But is this all? Can we see no farther than granary and crib? la the barn so large we cannot see the aky?

Tell me, rather, how many churches have been hulli-for man ahali not live hy hread alone. Tell me bow many souls this year of our Lord bave decided to make heaven their bome; how many young mea and women have gone out from halls of learning to help make this fired, sin-sick world

tittle more livable. I want to know n how many places the standard of he cross has been set up. What is success, and what in true success Forevermore it must remain true that a nation, like a man, cannot five by

Men become so wrapped up in maerial things, the external. and the tangible, they seem to forget there is a noul to save and a noul to feed and that there is such a thing as the bread of life. Man needs fellowable, the lithle, the church, communion.

Who Shall Grow? Who is it shall mount up on wiage

as eagles, shall run and not be weary shall walk and not faint? Who shall grow in grace? Who is it will go from strength to strength, from victory to victory, till one day they ap pear before God? It In that one who has heard the words, "Man shall act live by bread alone."

Do you remember the patbetle story of Erau, who, for one morsel of meat soid his hirthright? For you know that afterward, when he would have inherited the blessing, he was rejected; for he found no place of repentance, though he sought it care fully with tears.

is it possible to seil the spiritual birtbright? Yes. flow much doen Satan ever offer for It? Never more than a morael of meat. It was all he gave the mother of the human race In the garden. She saw, she desired. she nte, she fell. What did she get in return? A mornel of meat.

So it has been in every age. Satan and the soul strike a hargain. much for the apiritual birthright? A mess of pottage, a mornel of meatnothing more. Man shall not live by brend alone.

May the food we eat, the life we receive, the strength we gain, causa those who come after us to say, as they see the work we did, "There were gisnts in those days."-Rev. Walter 1. Ferrin, Congregational cburch, Pekin, 111.

Little Faithfulness.

Many of us are not called to do great things for God, but all are called to little faithfulnesaen wrought out in the common tasks at hand. A beacon light of bope to the humble soul faithful over the lowllest tanks done as unto the ford is the great lesson of ('hrist's parable of the talents. TWO VICTORIES ARE NOTABLE

Tamparanca Paopia Highly Elatad Ovar Events Recantly Enacted at Nation's Capital.

The two great principles of total abstinenca and prohibition have lately received wonderful impetus-the first in the attitude of the administration at Washington, the second in the pasange by the last congress of the bill regulating laterstate shipment of liquor

When a faw days after March 4 the morning papers reported that this was to be a "white ribbon administration" there was great rejolding among the temperance forces, and from National W. C. T. U. bendquarters the following messags was promptly seat over the wires:

Mrs Woodrow Wilson, the Wbita floure, Washington, D. C.: Ws are laexpressibly glad for the noble decisioa made by the Wilson administration in regard to the non-use of wines and liquors. The beneficent example, safe. for all to follow, will bless numberless lives and brighten countless homes. A the father to remember his fanits and haif million white-ribboners, in com t to spenk to Pharnoh of the prisoner. mon with other millions interested in the young Heldew who was servant to humanity's weal, are wafting you today their heartfelt thanks.

LILLIAN M. N. STEVENS. President National Woman's Christian

Temperance 1'nion. The temperance principles of Sacre tary and Mrs. Bryan are well known, and it is said that most of the cabinet if the messenger told Joseph why he members are total abstainers. BAR THEIR OWN CUSTOMERS

Liquor Daaisra Wen't Patroniza Profunnional Man Who Drink-Wast Claar-Hnadad Individuals.

Some of the hest arguments against the liquor traffic come directly from those engaged in the husiness. If their minds could be read, it would he discovered that they rate their bushgenn none too highly, and would be glad to be out of it were there no financial reasons in its favor. A Chlcago dentiet, an ardent temperance worker, han among his customers the wife of a naloonkeeper, in reply to hin query as to why she continued to patronize him, lnasmuch as he gave no custom to her husband, she said our goods. When it comes to that kind of nervice, we went clear hended la-

DEFEAT CAUSED BY DRINKING

One Great Bettle in American War fer Union Caunad by Officar Canfusnd by Liquer.

General O. O lloward given tha following among other instances of defeat through drink in the American war for the Union: "In one of our great hattles we suffered dafaat, and many of un bave believed that the mistake which canned the defeat was due to an excenn of whisky drunk by the officer in command. I had the testimony from an officer who was with him that pitchern of liquor were brought to his table, and that be and those arouad him drank as freely from them as if they coatained only water. The orders the commander gave were the direct opposite from those he would have given had be act been suddenly confused by drink. A heavy loss of men and material, and a dreadful defeat for our caune, was the result.

Protest That Counts.

It is a great thing for the voter to make his protest against the liquor traffic in prayer-meeting or by hismanaer of life, but if ba would really tell the government, as well as the Lord and the people, that he wants the naloon cioned, there is hut one method by wblcb he can be recognixed; but just one law under wbich bls opinion can declare itself, and hin coaviction make itnelf feit, that law and metbod are fulfilled when he drope into a box a ballot that calle for probibition .- Frances E. Willard.

Bast Strike.

Many and urgent are the questions that the working men and women of aver may be said of mathods in genstrikea-in particular, an a temper-

SUNDAY

Lesson VI.—Second Quarter, For May 11, 1913.

THE INTERNATIONAL SERIES.

Taxt of the Leasen, Gan. xll, 25-40. Memory Varnas, 39, 40-Geldan Taxs, 1 Pat. v. 5-Commentary Pragared by Rev. D. M. Stearnn.

Pharmon's third day birthday party of last lesson (xl. 20-23) suggests ether third day incidents, and there are many, all jeduting anolated eyes to the greatest of all third day evenis, Ilis resurrection from the dend with all lis benefits to believers to be fully enjoyed at our resurrection from the dead.

Now we have a third year atory of sudden and unryelons expitation from a dangeren to a throne, from a place of darkings and suffering to the most prominent pince in the pawer of Pha ranh to grant, for we read, "If came to pass at the end of two full years (xii, ii. Two years of forgetfulness on the part of the latter, two years of continued humiliation for Joseph, and then "it was enough," God's time of deliverance for tils fulthful pervant had come.

Pharaedes drenus, which nit the wise men of Egypt could not Interpret, led the caption of the gunrd and who could and did correctly interpret drenms (x1), 913). Then was Joseph made to run ont of the dangeon, having shaved him neif and changed his ralment probably with more inste than he had ever done in his life before (verse t4 margin) nitity Joseph and visions of deliverance near at hand. As he stood before Pharach the king and that he had dream ed a dream which no one could interpret, but he had heard that Joseph could understand and interpret dreams

In his rejdy Joseph acknowledged nges ua. God, saying: "It is not in me. God "Likely shall give Pharson an answer of pence" (verses t5, 16). Charach then told Joseph his two dreams and added, "I told this unto the magicians, but there was none that could declare it unto me" (verse 24). We may easily lungine Joseph lifting up bis heart to tiod as he listened to the king's recital of his dreams.

What a phrture-a man who had been shut away from the world and all the wisdom of the world for years in the presence of a great king, but more consclously in the presence of the King of kings and in communion with ilim and therefore knowing what all the wis dom of this world could not teach him! We see the same great lesson in the case of Danlel and his friends, for when all the wisdom of Baliyton could neither tell the king the dream nor interpret the dream when he told it nor read even four words written by God funded by the Spirit of God could do "If you had patronized our natioon, you all The mostern shotarship, so called would not have seen me in your office or the wisdom of this world in just as again. My hushand and I loag ago helpless today to understand the things made up our minds never to employ of Bod, for they enn only be known by a doctor, lawyer, or dentist who used the Stdrit of God tl Cor. il, 111. Jo sigh being a man to whom of God was, he could by the Spirif in terioret the drenn to the king and naw as he tidd the king that God was show ing Pharnon what He was alsort to de-

He also told Pharaoh that Inasmuch as the dream was doubled it was be cause the thing was established by God and that the would shortly bring it to pass (verse 32). The king was so inpressed by the superuntural power in this man that he at once promoted him to the highest place of power, saying. "Buly in the throne will I be greater than thou" (verses 30, 40). Could any thing be more thrilling than such words as those of verses 11 to 45 addressed by such a king to a man just out of prison? Itend carefully and try and grasp the situation-yesterday in the dangeon, where he had been for years; today next to the king, ruler over all Egypt, clothed with royal apparel, rid hig in the second charlot, every knee bewing to him, and no one able to do anything without his permission! Consider his new name signifying "The min to whom secrets are revested," and see him married to a princess (verse 4%, mnrgin) is it any wonder that he called his

first son Manusseh saying,"tiod bath made me forget all my toil," and his second Ephradin, saying, "third both chosed the to be fruttful in the land of my attitetion?" (Verses 51, 52,) And he was an Ismelite! (th how the suggestions crowd in concerning film to whom Nathaniel sald, "Intibl, thou art the Son of God. Thon art the King of israel" (John I, 49). Then bow won derful that Joseph was just thirty years old! (Verse 10, Compare Litke ill. 21.t the was seventeen when his brethren sold tilm (xxxvll, 2), so be had thirteen years of suffering. Itat be lived to be 110 (1, 20), so the find eighty years of excitation, long enough to forget a lot of hard things. What will an eternity of glory menti compared with our laief time of triut here?

Some of Miss Hatsershon's typical suggestions on this chapter are his be today must belp to decida. But what, ing reised up from the prison, his be ing filled with the Spirit, his depend and of special methods—as ence upon tiod, tils wisdom, tils antimrily, every knee bowing to tilm; bis ance woman I am confident that the glocy, his fruitfulness effect. Iv, 14: best strika is to strike against the Jidin v, 19, 20; xr, 5; xli, 24; Acts li, 21; saloon and than to strike against all x, 38; Col. ti, it; I'mit ii, tit; Iss. ix, ii, 7; politicians and parties that do wrong illi, 11; 11eb. lit, the discept abme had to the worklagman. Those are the control of the com. All had to git to two strikes that will pay.-Frances R. him, and nit requiries came thought.

18: 11. 5; Amos 1111, 11; Isn. x11x, 6t.

TRAIN YOUR BOYS AND GIRLS RIGHT

Don't Let Them Waste Time It was a slack evening in the office, on Useless Studies.

WHAT CAN YOU EXPECT? conversation disturbed him

as a Farmar-Yat Agriculturs is cent quarrel and reconciliation. Quits se Important as the Classics of the "Learned" Professions.

Could you expect to rear a fine trotlimit if you sent the langt in its early south to a man who trained a stableful of fancy suddle stock? Can you expect your boy to go through the ordipary rural high school and have him "atay filtelied" on the farm? These propositions are kientled. The average county high school holds up ideals and teaches topics tint will necessarily lead the boy to sigh for a city career in the learned professions, so called.

Are you good I to blame? Of course are it is only necessary for the rent, the taxpayers, the everyday olks who hold the purse strings to say: "Here, we have had enough of an edn cotion that is second that it is mustyan education that is all books. Clive our children un education that fits them for life here at home."

This new education that will fit people for life is coming, but it is coming too slowly in the country. Our very best young blood is being siphoned out of the country and luto the city. The cities do not need this fine new blood; the corntry does.

It is quite easy to say that the cry is rising, "Back to the farm." But it le not at all easy for the city man to go-in fact, the city man, the man bred and born in a big city, can haritly go back to the soft with any degree of certainty that he will succeed. He tacks the technical part of farm work that comes through daily contact with live, growing things, that contact which the country buy has had since the day he first began to motice tilings.

If these statements seem at all too strong simply idek up the Kentucky Educational Directory of 1912. Turn to the list of county high schools on, page 34 and run through them. Out of about 150 approved high schools 114 are classical or English high schools and only thirty-six are acleutitle high

dust so long as our country boys are pushed through schools that are classical in their tendencies just so long will our rural population drift city. ward, for their education has developed them most carefully for that life. IF YOU'R BOY IS TO FARM - TRAIN HIM FOR A FARMER.

IF YOUR BOY IS TO BE A PRO-PESSIONAL MAN TRAIN HIM IN TRAT DIRECTION

THIS IS 1913.

Would you plant and harvast se in

in 1850

Would you breed razerbacks se in If everything on your farm and In

will you insist upon a school that was planned in tSa?

If your children are to five and earn a flying in 1913 would it not be better to give them a 1913 education?

BY ALL MEANS.

Superintendent Barker has the right ides. He proposes to establish au agricultural course in the West Liberty igh actiont. That should have been me at the outset. Wonder If there be any who are so shortsighted so to appose? We hope not. An awful howl would be rulsed if some one should propose to take history, graumer or civies out of the currienium. Agriculture is just us important as either of these.-Editorial Licking Valley Cou-

\$500 IN GOLD FOR PRIZES IN CORN AND TOMATO GROWING.

TWO CAPITAL PRIZES OF \$250 IN BOLD EACH ARE OF-FERED BY MR. J. R. MTMI-RAN FOR ROYS AND GIRLS WHO ARE MEMBERS OF CLUBS WORKING IN KEN-TPPKY. IT IS HOPED THAT THESE TWO HINE PRIZES WILL CAUSE THE YOUNG-STERS TO PISH THEIR CRUPS TO THE LIMIT.

THE HOYS CORN CLUB BOY WHO IS CHAMPION FOR THE STATE AND GROWS MORE THAN 150 BUSHELS OF CORN ON HIS ACRE WILL RECEIVE \$250 IN GOLD.

THE GIRL WHO EXCELS IN HER TOMATO CANNING OVER ALL THE OTHER GIRLS IN THE CLER WORK IN THE STATE AND CANS UVER 800 QUARTS WILL SE-CURE \$250 IN GOLD.

WRECK OF THE 10:10

l remember, and a group of ne were sitting chalting around the reporters' table farthest from Dunning, the night editor, who had looked around rather frowningly once or twice, as if the

Broad's fishcee was to arrive that evening on the 10:10 from Washing-A Bey Trained For a Profession is Not hrating in honor of the event, was ton, and Broad, who had been cele-Apt to Ba Contantad or Successful telling us all the details of their re-

"Sh h!" said some one; and just then a boy entered with a late edi-tion of the "l'isnet," wet from the press, and handed it to Dunning

"Mr. Broad!" he said shurply, and then, changing his mind, left his seat and hurried toward us. "Mr. itrosd, I want you to go out to Crayfield instantly. The 10 10 from Washington has been wrecked outside the station. liurry, and telephone all the news. And say, try to get a list of the dead."

"My God!" said Itroad, and sank down into his seat. He hurled his face in his hands and his shoulders shook convulsively. Somebody explained the situation in a few words, and Hunning's face took on an expression of intense sympathy. He placed one arm about itrond's shoulders and drew him to his feet.

"Too had, old msn," he said. "But I guess you'll be crazy now unless you travel so fust. get to Crayfield as soon as possible, so perhaps it would be the kindest thing to let you cover the assignment." himself together.

Then, one after another, he detailed us; one to the railroad offices, another to the president's house, another to eatch the general manager at his club. I was among the few not assigned and, retreating to my desk, waited. We did not like to think about the

"Yss, I'll Go."

Would you light your house as in broad. There was nobody but liked 1850?

Three-quarters of an hour elapsed. Dunning sat stiffly at his desk, writing indefatigably, glancing over filmsies and casting copy aside. His face was blanched; the situation seemed your home bears the mark of 1913 why to have affected him as much as any of us. Once in a while the telephone would ring, but it was always local news or a report from some of the men on assignment. There was no word from ilroad.

BY HAROLD CARTER.

Continued Attack on Railroads Disrupting America's Power

By President ARTHUR T. HADLEY of Yale University

HE American nation may LOSE ITS GREATNESS if the temper shown by recent unreasonable attacks on railroads is not altered.

I am afraid that neither the public nor the government Is awake to the real state of things. In our endeavors to control corporations we TOO OFTEN TRY TO LESSEN THEIR EFFI-CIENCY INSTEAD OF INCREASING IT. We are appalled by one milroad accident, and we suggest that every engine should have two engineers instead of one. A fast train runs off the track, and a government officer suggests that people ought not to want to

IF THESE VIEWS PREVAIL THE DAYS OF AMERICAN GREAT-NESS ARE DONE. A PEOPLE THAT BELIEVES IN DIVIDED RE-"Yes, I'll go," cried liroad, pulling SPONSIBILITY AND WASTE OF TIME HAS NO FUTURE. THERE IS COMPETITION BETWEEN NATIONS, WHETHER THERE BE COMPE-TITION WITHIN THE NATIONS OR NOT, IF WE ARE CONTENT TO TAKE THINGS EASILY, GERMANY WILL BE ONLY TOO GLAD TO GET AHEAD OF US.

What is to be done in the face of this state of things? In the first place, we must CONTINUE TO REWARD THE EFFI-CIENT MAN. The fact that competition will no longer do this automatically must make us all, as part of our public duty, lend a hand to the men who are getting things done. We shall deal with the problems of corporate regulation and with the abuses of corporate management more effectively if we are willing to appreciate

We must develop a system of FIRST CLASS TECHNICAL TRAINING AT LOW PRICES, like that which has been so successful in Germany. The great obstacle to good technical training in the United States in the past has been the idea that public schools ought to be free.

"If she's among them," hegan Kemp to New York was ditched on the far and we knew he meant the dead-"Broad won't telephone."

"O yes, he will," I answered confifield. Dunning took up the receiver and held it to his ear a moment. Then he called me.

'It's Broad," he said. "He's calling go into a booth; take it down here. I've told him to go slow. And say," he added, "don't let him get away without giving you the list of the casualties."

was safe.

"How is she?" I called. "Fine." answered Broad's voice, I thought there was the suspicion of a soh in it. "Are you ready? O, Miss Phayre? Just a trivial injury, thanks, old man. The 'Planet' story was Incorrect. Now I began taking down the story, while Dunning looked over my shoul-

"The 10:10 train from Washington

side of Crayfield at 10:02," I wrote. "A broken rail is believed to have been the cause of the accident. The engine dently; and at that moment the tele- and the first three cars plunged down phone rang so sharply that somehow 1 an embankment; the remaining cars knew it was Broad calling from Cray. left the metals, but did not overturn. The passengers all escaped with minor injuries except one unidentified man who-"

Suddenly Dunning pitched over and and says he has a good story. Don't fell to the ground. He had fainted. Kemp ran to raise him, aud, temporarily diverted from the telephone by the occurrence. I found myacif glancing at the copy of the "Planet" in . Dunning's half-opened drawer of his desk. I took up the receiver and at the On the page facing me I read, among the list of the dead:

"Mrs. George Dunning of Washing-

The great German gun klugs, the Krupps, have made commercialized warfare a more important consideration than dollar diplomacy.

BICKNELL & HARRIS, Real Estate Agents

BEREA, KENTUCKY

A FEW OF THE BARGAINS WE ARE OFFERING

This is a real nice and convenient home on one of the best streets in town, has concrete walk in front, also concrete walk in rear to barn. This property would be cheap at \$2,000-but we mean to sell it. Give us an offer.

Number 2. One large two story concrete store house in the best luisiness part of Berea, almost new, cost over \$2500. Owner says it must sell as he is making a change in business. Now you, Mr. Man, who have been looking for a chance to own one of the liest business places in Ky. stuke while the iton is hot, this fine building only \$18co-

Number 3. Almost new, two story seven torm house on Boone St., near Chestnut St., on the hill. Good garden and barn, some truit and a large cistern. This is one of the most desirable benes in Berea. Can be hought for \$2100-on good terms.

Number 4. Nearly two acres of land, good four room coltage and barn on Chestunt St., just out side of city limits. No Town Tax to pay. A great bargain at \$1350.

Number 5. One two story frame business house on Main Street, Russell Springs, Russell Co., Ky. Worth \$1,400.00. Good terms.

- Number 6. Farm laying two and one hall miles Ironi Russell Springs, Russell Co., Ky., containing 450 acres, 300 cleared and under fence, rest in tim-

Number 1. Five room residence on Jackson her. Sandy loam, clear of stones and lays rolling. Street, Berea, Ky. Has bath and water in house. Thirty acres in grass, forty in wheat, sixty acres fresh cleared, has been cultivated only two years. Four room tenement house with barns, one new framed, nine room resident building, ceiled and papered. This farm will cost you \$20,00 per acre.

> Number 7. We also have residence property and building lots in the beautiful College town, Berea, Ky., for sale on reasonable terms and

> Number 8. Blue grass larm, in Clark Co., thirteen miles south of Lexington, containing, to71/6 acres, well fenced, lays almost in a square, pike running thru farm. Residence and all necessary buildings in good repair, and as good blue grass land as there is in Clark Co. This larm can be had now for \$100.00 per acre. This is a great hargain. Write to us at once.

> Number 9. We have some very line boundaries of white oak, chestuut oak, poplar and other kinds of timber for sale. If interested write us.

> Number 10. The best farm anywhere near Berea. Just outside of corporation, containing 100 acres, all newly fenced, and in lour fields, water in each field. All kinds of fruit, best larm house in the country, good barn and out buildings. This farm can now he had for \$125.00 per acre.

> If you are in the market for anything in our line, write us what you want, and we will try to please

SIX DOORS

FOR ASPIRING YOUNG PEOPLE

1st Door—Berea's Vocational Schools

Training that adds to your money-earning power, combined with general education.

FOR YOUNG MEN-Agriculture, Carpentry Printing, Commercial. FOR YOUNG LADIES-Home Science, Dressmaking, Cooking, Nursing, Stenography and Typewriting,

2nd Door-Berea's Foundation School

General Education for those not far advanced, combined with some vocational training. No matter what your present advancement, we can put you with others like yourself and give chance for most rapid progress.

3rd Door-Berea's General Academy Course

For those who are not expecting to teach and who are not going through College, but desire more general education. This is just the thing for those preparing for medical studies or other professiona without a college course, It also gives the best general education for those who wish a good start in study and expect to carry it on hy themselves.

4th Door—Berea's Normal School

This gives the very heat training for those who expect to teach. Courses are so arranged that young people can teach through the summer and fall and attend school through the winter and spring, thus earning money to keep right on in their course of study, Read Dinsmore's great book, "How to Teach a District School,"

5th Door—Berea's Preparatory Academy Course

This is the straight road to College - hest training in Mathematics, Sciences, Languagea, History and all preparatory subjects. The Academy is now Berea's largest department.

6th Door—Berea College

This is the crown of the whole Institution, and provides standard courses in all advanced subjects.

Questions Answered

BEREA, FRIEND OF WORKING STUDENTS. Berea College with its affiliated schools, is not a money-making institution. It requires certain fees, but it expends many thousands of dollars each year for the benefit of its students, giving highest advantages at lowest cost, and arranging as far as possible for atudenta to earn and save in every way.

OUR SCHOOL IS LIKE A FAMILY, with careful regulations to protect the character and reputation of the young people. Our students come from the best families and are earnest to do well and improve. For any who may he sick the College provides doctor and nurse without extra

All except those with parents in Berea live in College buildings, and many assist in work of boarding hail, farm and shops, receiving valuable training, and setting pay according to the value of their labor. Except in winter it is expected that all will have a chance to earn a part of their expenses. Write to the Secretary before coming to secure amployment.

PERSONAL EXPENSES for clothing, laundry, postage, books, etc., vary with different people, Berea favors plain clothing. Our climate is the best, but as students must attend classes regardless of the weather, warm wraps and underclothing, umbrellas and overshoes are necessary. THE CO-OPERATIVE STORE furnishes hooks, toilet articles, work uniforms, umhrelias and other necessary articles at cost.

LIVING EXPENSES are really below cost. The College asks no rent for the fine buildings in which students live, charging only enough room rent to pay for cleaning, repairs, fuel, lights, and washing of bedding and towels. For table board, without coffee or extras, \$1.35 a week, in the fall, and \$1.50 in winter. For furnished room, with fuel, lights, washing of bedding, 40 to 60 cents for each person.

SCHOOL FEES are two. First a "DOLLAR DEPOSIT," as guarantee for return of room key, library hooks, etc. This is paid but once, and !a returned when the student departs.

Second an "INCIDENTAL FEE" to help on expenses for care of school hulldings, hospital, library, etc. (Students pay nothing for tuition or services of teachers-all our instruction is a free gift). The incidental Fee for most atudents is \$5.00 a term; in Academy and Normal \$6.00 and

PAYMENT MUST BE IN ADVANCE, incidental fee and room rent by the term, hoard by the half term. Installments are as follows;

Any able-hodied young man or young woman can get an education at Berea if there is the will to do so.

It is a great advantage to continue during winter and spring and have a full year of continuous study. Many young people waste time in the public schools going over and over the same things, when they might be improving much faster by coming to Berea and starting in on new studies with some of the best young men and women from other counties and states.

Applicants must bring or send a testimonial showing that they are above 15 years old, in good health, and of good character. This may be signed by some former Barea student or some reliable teacher or neigh-The use of tobacco is strictly forhidden,

PATRONIZE HOME MERCHANTS

Community of Fellow Assistance Nacessary to Bast Interests of Town or City.

There is a disposition of the American to disregard many of the usual things that make for good fellowship There are a great many men and women who profess and doubtless feel warmly for the success and welfare of his congenial neighbor, but who commonly overlook frequent opportunities to do the neighbor a good turn in a business way.

One citizen whose friend is in a dif ferent business profession or trade will carelessly let pass occasions, when a kind word of recommendation Mr. S. A. D. Jones of Richmond was would get him a job, or make him a in this vicinity, this week, canynasing client or secure him a trade, or win hlm a customer.

in fact, distant competitors of this neighbor or friend will get a boost and the neighbor be forgotten. Many a doctor hnn lost a prescription fee, and a lawyer a client, and a mechanic a contract, and a clerk a position, and many merchants paying customers. because their social neighbors or friends forgot to spenk a business recommendation

The writer, says the Houston Labor Journni, has heard it said that social friendships are more expensive than profitable. If true it is a moral and economical wrong

This quality of neglect has made a hard-henried struggle for existence and breds callousness in the conflict of human affairs. The same principle of mistaken selfishuess and neighborly indifference has been feeding the growth of that unpatriotic snirit, which natronizes the mail order system. The system which if further encouraged by practise and by legislatton, will lead to the closing up of many local stores.

To send off for your most valuable articles of mercandise to "big mail order factories," perhaps whose business is financed by a group of capitailsts who are stiently hullding up a great syndicate or trust to destroy the tocal merchants, the local middle men. is to create in the end in this country a condition where there will be no competition in prices. At the same thoe your are creating a altuation

patronize mail order houses; of course you don't You breach the sound doctrine of "patronize home industry," "keep home dollars at home," etc Good; amen' 'Itut do you practine it? the you send your printing to -If you do, do you get any returns through the channels of trade? Of course you do-NOT. Hold up your town and patronize the home printer

HAD LOTS OF FRIENDS

By J. M. CARSON.

Leonard's velocipede, with its rub her tires, sent hy his Uncle Tom for his birthdsy, ereated quite a stir when it arrived. After it was taken from the crate all the family admired its perfect mechanism and its beauty, but Leonard said nothing.

What do you think of it son?" asked Leonard's father.

The boy came out of his irance with a deep sigh of satisfaction. "Gee, but won't the kids oil be jenious!" he said rapturously.

The long hail hetween the dining room and the living room was immediately turned into practice ground. Leopard's father gave him some ex pert advice. The boy learned quickly, All that evening and the next day was devoted to hard, steady practice.

"I think you can ride well enough to take the wheel out of doors tomorrow," Leonard's father told him at the end of the second day of train-

"I don't want to take it out yet," replied the boy. "I want to learn a few tricks first." And he proceeded with one foot or holding with one hand, and various combinations of these interesting performances.

The next day was Saturday. All the ehildren were playing out of doors Leonard was now ready to make his sensational appeaarnee. He was certain that his velocipede, or his "bike," as he chose to call it, would make a great Impression.

Several of the boys in the neighborhood were the proud possessors of velocipedes, but none of these had rubber tires, nor were they painted with such heautiful colors and stripes. Then, too, Leonard had been having and now was his chance to even things up.

With an air of conscious importance he waiked out into the street, trunfling his velocipede before him. mounted it, and rode away to the corner, then turned back. Immediately members of the class. the report was spread the Leonard had the swellest blke on the street. ily the line he returned to his own doorstep a smail delegation was awaiting blm

"liello, Len'" cordially went up from every throat.

"Hello!" answered Leonard. "Got a new hike, Len?"

"Yep."

Where did you get it?"

"From my tincle Tom." "i bes it go good, Len?"

"Dandy," incontraily replied Leon-

"Bet you ean't do no tricks-yet." ard proceeded to do a few of his very abode. best ones. The spectators were properly fascinated by the exhibition.

Say, i.en. I'll let you ride on my hand car, if you want to. I didn't mean nothin' that time when I didn't let you."

Leonard made no reply to this offer. "Oh, len, i ain't mad at you," came from another hoy. "You kin come and play cowboy in our yard this efternoon if you want to. I got some new wooden swords. Will you come?"

'Sure i'li come," said Leonard. pitcher show wintout payin' no pins, the ministers in charge of the aeri.econard," spoke up a third

"Are all you kids goin' to be good at Murray. me" asked Leonard.

"Sure, we are," they answered in chorus.

"Well, said Leonard, "I was goin' to give all you kids a ride on my new bike to he good at me and "at me play in all the games, and the 's, but you're all good at me anyw. , so I guess 1 don't have to give you eride on my hike."

Off he rude at full apeed, going through the whole list of his tricks as he went

Modest Scientist.

Near the little village of Nyack there lives in modest retirement upon the farm of his fathers and of his own boyhood George William iiiii. though he is perhaps the greatest genius that this country has as yet borne, it is safe to say that not one person in a thousand, even among people of education, is familiar with hes name, much less with his work llut among astronomers, both abroad and at home (possibly more abroad than at home), he is recognized as being one of a very few to whom astronomy of the present day owes most liere again discoveries form no part of this notable career; and, in fact so far as records go, lill may never have used a telescope. His greatest work is in connection with periodic orbits, the best method yet devised for handling the problem of three bodies under certain restrictions.-Dr. Frank Schlesinger, in Sci-

Cata and Monkeya. As exciting battle between eight monkeys and thirty cats occurred on the United States battleship, Minneecta, a few days ago. The trouble occurred while the Minnesotta was in heavy storm off the Florida coast three days out from Vera Cruz. The monkeys, which had been collected by junior officers, got loose and made a concerted attack on the thirty cata, which are pets of sailors and whose duty is to keep the big ship free from rats file monkeys pursued the cats all over the step and despite many

scratches a reserve in building them.

SENIORS ENTERTAINED

Among the many joyful occasions which Seniors look forward to with anticipation in their jast College year are the round of diuners given in their honor by their various t'ollege Professors and friends.

realized, Monday evening, when the Seniors gnthered at Mr. and Mrs. 11. E. Taylor's hospitable home at 5:45. After a few minutes pleasant conversation on the veranda, the gueste were assembled in the dining room and a delicious four course dinner was served by three of the young ladies from the Junior class.

On repairing to the sitting room anusements were engaged in which were of a very varied character and highly catertaluing.

One of the stunts which created peals of hilarlous laughter was a pirformance which might well be called a "barnyard concert" in which the merry cluck of the hen, the lusty crowing of the rooster, the contented grunt of the pig and the ear splitting bray of the donkey had promiuent parts.

Another entertaining, and one might say, instructive feature of the evenlng was a marriage scene from which to learn tricks that consisted of riding many suggestious for similar occaswithout holding the handlehars, riding lons were obtained. In addition to these, Mr. Taylor played some beautiful selections on the organ, tlerman songs were suuk, and Miss Tauities gave a witty and clever prophecy of the class. Altogether it was one of the most enjoyable evenings which the Seniors have bad this year.

SUNDAY SCHOOL CLASS SOCIAL

Mr. Taylor's Sumitay School class was delightfully entertained at his home, Tuesday might from 7 to 9:30. Music was one of the striking feaquarrels with some of the boys istely tures of the program. After the music, speeches were given by some of the members of the class, "The Personei of the Class was given by A. E. Webb The speaker laid great stress upon cure a seat. possibilities of the individual

> J. N. Harrold gave a speech on "Opportunity" chiefly the opportunities which Berea College affords.

> "Athletics" was discussed by Walter Hatch in a very striking way.

liarwood C, Fowman gave the "Class Prophecy." In his address he emphasized very strongly the differ-"Gee, it's swell, ain't it, boys? to make a person successful in any one of them.

The orchestra again played while an ice eream course was served. Mr. Griffith and Mr. MacGregor sang reveral solos, atter which all depart-"Sure, I kin. Tricks is easy " Leon- ed for their respective places of

B. K. VS. UNION

The debate between the Beta Kappa and Union Literary Societies on Wednesday was one of unusunt interest and has trought out much comment by professors and ex-debaters of the institution.

The question in short was, Resolved, that ail corporations doing an inter- two hard cooked eggs through a state business should be required to take out a Federal charter.

Meaars, Jesse Murrell, Roy Hatch and Carl Vogel representing Beta Kappa upheld the affirmative, Messrs. Loyd flampton, floy flouse and William Dean in behalf of Union contenned for the negative, House and Voget ful each of red and green pepper cut delivered rebuttals.

Both sides admitted the evils of the present system of corporate conthe Cincinnati Enquirer has been able by reason of infirmity to get troi and each plead for publicity. As a means for bringing about publicity and correcting the cylis of overcapilization, interiocking stock-holding, rebates and false reports, the affirmative made strong and telling arguments for the Federal charter.

The negative objected to the Federal charter on the grounds that in making the change it would upset business, rob the states of a large portion of their revenue and destroy the balance of power between the States and Federal Government, They proposed the plan of a Federal ticense working under the direction of the Interstate Commerce Commission as a remedy for the existing evils.

The decision rendered by Rev. David Philipson, Jackson W. Sparrow Esq., of Cincinnati, O., and Prof. C. F. Rumold of Berea who ucted as judges was announced by Mr. it. E. Taylor two to one in favor of the affirma-

are healthier and imppler than those who have none. All the wealth of the world could not buy you a friend or pay you for the loss of one. The manner of preparation and serving

of food is as important as the food

TESTED RECIPES.

Add a little lemon juice to the butter with which lettuce sandwiches are spread.

Geistine Ambrosis,-Sosk half a box of gelatine in a eup of cold water; when well softened add two cupfnis of boiling water and three-fourths of a cup of sugar. Let this thoroughly dissolve hefore adding the juice of one and a half lemons with the grated rind. Strain, and when the mixture begins to thicken, put in two oranges cut in thin slices and add a haif cup of shredded cocoanut. Serve cold.

Spanish Chicken With Rice.-Cut State University last October, was de- up a chicken for frying. in the frying pan put haif a cup of olive oil and heat gradually, adding two hruised cloves of garlic. When the garlic is yellow, lay to the chicken and cook unifi well browned; add two sweet red peppers cut in strips, two white onions sticed, and continue cooking.

When the onions are brown, add four tomatoes sliced and a quarter of a pound of rice, cover with water or stock and simmer until the rice is tender, adding more stock and sait if necessary.

tndien Dressing-Ruh the yolks of strainer, and add a fourth of a teaspoon of paprika, one teaspoonful of sait, half a teaspoonful of powdered sugar, a few grains each of cayenne and white pepper, a tablespoonful of lemon juice, two tablespoonfula of vinegar, and one half cup of olive oil. When well blended sdd a tableapoonin fine piecea and one teaspoonful of paraley chopped fine.

Nellie Maxwell.

Woman Contractor.

Scharmegendorf, a growing and fashionable suburb of Berlin, prides itself on poasesaing the only woman hullder and contractor in Germany. This is Frau Henkel, who has now car. ried on her business aucceasfully for four years. The fact that she was the proprietor and manager of the firm of itenkel became public only the other day, however. The public authorities were asked to inquire into the husiness, as there was an allegation that it was not an independent concern. They found that Frau lienkel was the real and effective manager, and that she employed her husband as master of the works. The suggestion that she was acting for some one else was unfounded.—Dundee Advertiser.

Even in Those Days. George Washington was tossing the silver dollar across the Rappahannock

last inn we stopped at," he explained. "You know how they talk about you when you overlook such things." For even in those days of liberty the walter was known as a despot,

This beautiful property lies on the south side of Chestnut Street, Berea, Kentucky., the lot being 60x200 feet, fronted by a concrete walk; a concrete basement under the whole house; arranged for furnace-heat; house also fitted for gas lights.

The house is constructed of good material and is well built. It has double floors, the top floor being of hardwood handsomely finished. The first floor rooms are finished in hardwood, the second in hard pine. The building is also storm sheeted and is plastered thruout with patent wood fiber plaster. There are three beautiful tiled grates with oak mantels with large french plate mirrors.

The water supply is from a deep bored well on the back porch. This is a most beautiful home. We are going to sell it if we can. Any one wanting a good home in Berea with an opportunity to send his children to school will find it to his advantage to write to Bicknell & Harris at once. We will be delighted to give prices on this property or any which we have. And we like to have calls also for we

can show better than we can describe the property. There have been some good bargains in the way of vacant lots and residence properties sold on Jackson Street recently. We have still some splendid offers to make-properties running in prices from \$500.00 up to \$4000.00 right in Berea and just out of Berea. We should be pleased to have any one take up the matter with us.

Yours very truly,

Kentucky

His Rise to Power

Sheehan's eyes haunted him. John was a normal young man, and he was capable of knowing the joy of a tank John. well done. But not this sort of task! He could find no elation in a triumph won at the cost of direct personal misory to others There was Slayton, for example, a handsome, pleasant young man who looked the criminal not at all. He had not had the courage to stand trial, and he had broken ball and fled, leaving a sick wife. She and the child born since the father's flight now iny together in a grave. Slayton had not dared to return. Perhaps he did not even know of the double tragedy. In his dreams John often asw Slayton's bunted face as it must now appear.

He became conscious that his head was aching, that he was thred all over, every nerve in his body throbbing. For more than six months, ever since his election, he had been working inceaanntly, feverishly toward this day. The release from strain allowed his maltreated, protesting body to be heard. He gut up and left the office, as though fleeling from the problem.

He laid a coundationt course ewey from Main street out into the country. He tramped determinedly along the pike, filling his lungs with the tonic elr. It had been a good "growing seaills way took him between fields of clean young corn and barley and oats and occasional cool, green

A farmer, driving a pair of heavy farm horses doing duty at the tongue of a squeaky spring wagon, rattled up

"Howdy, John: Want e lift?" "Howity, 'tti! No, think you, Just taking a little exercise and soaking in

Cranshawe reined to his team. John

"Little mite too amart fer 'em today, "They had been so bold, they made

It easier " Cranshawe nodded "He amarter next time, I reckon-'f we give 'em a chanct. | chine," John added incautionaly 'F we give 'em a chanet," he repeated reflectively "Un farmers, we're feelin' purty good epont these trials. Feel like we didn't make any mistake hast

"Murchell says you forget," John emiled back.

"Ite'n et ve a'ready, bas he?" Cranshawe asked shrewdly. "He'll be et ye harder, before ye're through. Ye got 'em scered. Melihy we'll fergit an' then melily we won't. But I gness that's our lookout, not yours. So fur's ye're concerned, all ye got to do is go chead an' try to finish up the job ye've atarted. 'F' we don't do our part, I guess we won't have nobody to blame but ourselves"

"The question is, em 1 big enough for the Joh?"

"No, that ain't the question," Cranshawe contradicted quickly. cause that can't be answered till ye've tried. The question ts, are ye goin' to be scared out by a lob because it's big. or are ve goln' to keen up what ve've started? 'F' ye dou't, there sin't enybody else to do it. An' we'll soon be back where we started."

John nodded slowly. Cranshawe did not pursue the point.

"I see Steve Hampden's back," he was at the trial. Came in late an' had then impossible." to stand by the door where I was city feller. Seen her of the rolly last fall too. She seems," he grinned quizzically, "to take consider ble intrust in ye. So long!"

Soon he was out of aight around a

turn in the road. John swung rapidly clong for an hour nntil the swest oozed from every pore of his body. Then he threw himself. under a tree by the roadside.

He pondered his problem. Yet be knew that it was answered, not by 'Iti Cranshawe's homely wisdom, but by the inscrutable purpose of the force which had impelled him into the fight He could not withdraw from the task was a question that he needed not to his futher's displeasure. And thought of Kniherine, whom, it sp peared, the winter had not taught to forget him life land not learned to for Work could dull, it could not wholly stitle, the longing for her. And knew that he could not say no to that which was calling him into service.

He walked home through the calm of aundown. At the corner where straids Blake and a companion. Warren etopped him to introduce the stranger. Halg, a lanky, endiversus individual who was the author of a much criticlsed novel, "The ftrethren."

"I heard you twisting Murchell's tail this afternoon," Haig drawled. you don't mind, i'd like to congratulate you-on your nerve. I've been wonder ing whether you are merely a brave man or a specimen of that splendid genns, the fool Mrother Blake inclines to the falter notion."

"Yes, Warren would," John smiled. "I do," said Warren colemniy. don't believe in agitation. It harts business-nut the agitator"

"In New Chelsea, Mr. Halg, we dally offer thanks for prosperity, good weath er and the old party." Haig's ready grin broadened as he

pinced a hund on Warren's shoulder "Here, Mr Immmeade, but for the grace of God, stand I. My people wanted to make me a banker.

"A dollar, Mr Halg," John put in, "held close enough to the eye will hide

himself lujo a cliffe and began to take That's very good. Wish I could liave

thought of It. "As we put it in New Cheisea, are you teaving aoon, Mr. Haig?" asked

"Lord, no! I'm here for my health. Doctor told me I'd been working too hard or not hard enough, I forget which, and that I needed fresh air for my itver. So I trailed up here after the Hampdens, where, by the way. Brother Blake and I are dining this evening."

"Yes, and we'd better start," Warren auggested patiently. "Ah, these flery lovers! Come around

and see me, Mr. Dunmeade. John promised, and they parted.

He reached home to be soundly acolded by Miss Italierta for his tardiness at supper. After supper he strolled into the library. The judge was reading by the desk, the light from the lamp throwing his cold, heavy features into sharp relief. He looked up tuhospitebly as John entered.

"finsy, judge?" John generally called him judge, feeling not without reason that his father took more pride in his office than in his paternity. Of inte he had had especial resson for this belief.

"Not too busy if you have anything of importance to illacusa. I suppose you expect me to pat you on the back because you've sent another man on the road to prison?"

"I have felt that you weren't in full

symputhy with it." "I am not" The Judge late his book on the desk and sat stiffly erect. John was immediately enalited to aympathize with those unfortunates who were arraigned before his father. "Now that the case is ended, I may speak frankly. As a Judge I, of course, approve of the punishment of crime. Itht I don't approve your going out of your way to attack your party and Senator Murchell. • fine, clean itving gentleman, who has always showed the warmest friendship for your famlly." Indge Hunmende spoke with re-

strained empireds. "And has created a pernicious ma

"Which elected you to the office you now hold." "Your memory isn't good, judge. The machine nominated me. The peo-

ple of Itenton county elected me, you may remember." "You couldn't have been nominated without Murchell's indersement."

"That, I'm sorry to say, ts probably true," John said, wishing that he had not ventured into the room. "t'm sorry you feel so about it. Good night.

Judge Dunmeade resumed hts book Now, the judicial temperament is not given to impulse. But as John went slowly out of the room Judge Dunmende experienced e novel sensation which in the brief moment allowed for reflection he was at loss to define. Later he decided that it was his generons nature asserting itself to give his son another chance. He may have been mistaken.

He that as it may, before John had passed quite out of the room he was recalled by on nnexpected "Walt!"

He returned. "Yes, father?" "I suppose," said the judge gruffly, "your father's interest can have no weight with you. It ought to be clear to you without suggestion from the that If you persist in attacking Senator remarked casually. "That girl o' his Murchell you make my lifelong ambi

"Are you still taking that seriously? The senator has been teasing you along with the promise of a justice-ship for ten years. Don't you know by this time that he has no intention of giv-

ing it to yon?" "He gave you a nomination." "Yes, he happened to believe he could make use of me. It seems to be solely e question of the senator's political necessities. 1-1 doubt that he needs

you father " "That means, I presume," the indge said bitterly, "tbut I count for nothing agalust your notlons? But I might have known it Good night?" he re-

pented Out in the clear night John walked slowly about. More than ever he realized the price which they must pay

CHAPTER X. Apples of Eden.

who would be voices

F the summer before had been gay, what shall we say of that which now opened? The center of gayety was East ridge. The italian villa was the scene of one continuous house party.

It was ineviable that John and Katherine should meet. It happened one morning a few days after the Thechan trial when John was leaving the postoffice with his dally mail A trap drew up in which sat Katherine and a young man John remembered a snying of hers concerning one whom "people were apt to speer at as a speculator," but whom she thought "spiendbl because he had had the brutus and courage to make his own fight and win." He had no difficulty in identifying that man with Gregg, of whom he had heard more than once Gregg was an nitractive fellow, a few years older than John, of nthletle build and pleasant manner He folged Kather-Ine in congrutulating John on his recently acquired fame

"We expect to see you often on the ridge There will be teanls. He will make you pluy," she said to Gregg. who responded pleasantly

"I'd like to have the chance, Mr Dunmerde t've been bearing about your game,"

HOME COURSE IN SCIENTIFIC **AGRICULTURE**

SEVENTH ARTICLE—THE DAIRY HERD.

By HENRY E. ALVORD, C. E., Former Chief of Dairy Division, Bureau of Asimal Industry, United States Department of Agriculture.

ILE pursuit of dairy farming depeuds for its success upon certain fumiamental conditions. First, the owner of the hustness himself, or otherwise the agent or manager who has the humediste control and personal direction of the work. must have a natural fondness for aul mals, prompting to generous and kind treatment, on well as good judgment in selection, breeding and care. It is not aufficient that he should be a horseman or fond of cattle in general. For best results ice should buve a special liking for the dairy cow over and above all other animals. Second, the cattle must be good of their kind and of a variety suited to the work. Third, the farm should be specially adapted to the bronch of husbandry in view. A good dulry farm is pretty certain to be good for general farming, but many carefully selected, all the requirements

good farms in general are not suited to dairving. The dairy farm should be of the business being well considered. Yet many disadentiages so far as the farm is concerned may be successfully overcome by the skillful dairyman, and dairying in some form le profitably conducted without any farm, so that this condition, important as it is, cannot be regarded as essential. Fourth, It is well to study the character of the accessible markets and the means of communication. Location and the lina

Photo by Tennessee experiment stollon

JERSAT CALVES

of dairying to be followed may be largety controlled by the markets. In some cases the markets form an essential condition, but modern facilities for transportation make the location of the dairy farm with relation to its markets comparatively unimportant.

Like almost all other occupations at the present day, dairying has become divided into several distinct and apecial lines These differ mainly as to the form of product and the mauner of diamosing of it. Milk or cream may be produced for delivery to consumers, and this delivery may be direct or indirect. The same products may be delivered to a factory for manufacture into hutter or cheese, or the milk product of the herd may be worked up at home and there converted into butter er cheese. 'The prudent dairyman should first consider which line of business he will pursue. In so doing he must have regard for all bis circuiustances-the location, markets, farm. buildings, water and lee supply, the labor at his command-and his own preference and prespects for profit,

Bome dairymen prefer a "general purpose cow," which is a member of a specially developed milk producing family from one of the beef grades or grades of such stock. An animal is thus secured which has a large frame. to easily kept in good fiesh and fattens soon when not milking heavily. Such a one also bas large calves, profitable for veal or for growing as ateera. Even if shielt animals ore not ao productive while in the dairy their meat making proclivities may make up for it. There are two or three of the establiabed breeds of cattle which claim to possess comitined qualities for mest and milk. On the other hand, many dairymen (including the writer) prefer caltle of the distinct chisa or type especially adapted to dairy purposes siona. This class tucindes various familles and breeds, all having the marked characteristics which distinguish the milk producer. thwners of such cows supect them to be so profitable as milkers that their beef producing quality and the final dispusition of their caresnees may be entirely ignored, and the caives, except so far as wanted to

several plans and arrangements between these two extremes.

Advantages of the colony plan are, first, small flocks on free range; second, no expense for fencing; third, there is less need for serupulous attention to cleanliness and providing regular aupplies of unimal and vegetable feed during summer months This plan, however, has the following disadvantages: First, extra cost of labor in caring for fowls in stormy weather, when it will often be difficult to get around to feed and care for the fowls regularly; second, houses fullt on the colony plan, if built as well, cost more than a continuous house of the same capacity, for partitions, which may be constructed largely of wire netting, are much cheaper than two end walls; third, the colony idan allows but about 100 birds per acre. while the continuous house system, with sultable yards, allows 450 to 500

birda per acre. The first consideration in locating buildings is a suitaide location for the poultry house or houses. If possible It is best to select an elevation having a natural drainage away' from the building, for damp ground means cold ground. If the house can be fullt in the lee of a windbreak or a bill or in front of form buildings, so much the better. A dry, porous soil, such as andy or gravelly loam, is preferalde to a clay soil, for the former is more easily kept in a sanitury condition. If It is innoracticable to select a soil that is naturally dry the soil should be made dry by thorough underdrainage. A purely sandy soll should not be se-

As sunlight and warmth are essen that to success, the fulldings should face the south. Other things being equal, they will be warmer and drier. When a direct southern exposure cannot be obtained a southeastern is preferable to a southwestern exposure, for fowls seem to prefer morning to afternoon son. A gentle slope facing the south is the most suitable.

It is best to build the houses during the spring or early summer, for then they have time to dry out during the hot days. Lumber is often rather damp and should be thoroughly dried out before winter Cement floors and foundation walls will also have an opportunity to dry thoroughly, and thus may be avoided much of the dampness so often attributed to them.

The size of the building required will depend birgely on the number of fowls to be kept and on the size of the flocks From forty to fifty, seems to be about as many as is safe and economical to keep together. With flocks of this size about five square feet of floor space should be allutted to each bird, which will suffice in most coses where care ful attention is given to cleanlinean and ventilation. If the fowls are kept in smaller flocks more floor space per bird will be peopled. Where the climate is so mild that it is unnecessary to keep the fowls confined, except for a few days at a time, less space per bird will be suttlelent. The smaller breeds, being more active and restless, require about as much room as the lorger treesls

For the greatest emount of floor space for the least cost a building should be somere, for, other things being equal, the nearer square a bouse is the less timber it will take. It is, however, out of the question to have a large house bullt aquare.

The building should not that the sun cannot reach the back of commissions, and even experiment the house, otherwise it will be damp, studion officers. Fourteen feet is a convenient width if there are no slley ways.

The house should be built sa low as possible without denger of the attendants bumping their heads against the celling. A law house is more eastty warmed than a high one.

When permanent houses are to be built it is usually most economical to erect them on foundations made of brick, stone or concrete. These should be fullt deep enough to prevent heaving by frost and high enough to prevent surface water from entering. Where large stones or bricks are not readily available good walls may be made from small stones. In case none of these foundation amterials is available the building nory be erected on

There are three general styles of roofs-the single pitch, the gable roof or double eitch with equal sides and the combination with one long and one

short pitch The single pitch roof is the easiest to build. It gives the highest vertical front exposed to the sun's rays and throws all the rain water to the rear. But in order to have the back wall of sufficient height to allow a person to the organization which is promoting work conveniently in the rear portion of the house it is necessary to have the front wall very high-unless a very slight pitch is used-which requires much more lumber for the front side than in the case of the other two styles. The gable roof provides for a garret space, which may be filled with straw, thus helping to make the house warm

and dry. The floor may be of earth, wood or cement. Earth floors are excellent provided they are kept dry. Except in die of the road? very dry climster, however, they are apt to be damp. Bourd floors are usually short fived unless air ta allowed to ity. circulate under them. A good cement floor is the best, for it is easily cleaned and very durable. It should be covered with one fourth or one-half inch of tine soll or sand and plenty of litter in constructing this floor the ground should be execusted to the depth of three or four luckes and then filled in with small stones or coarse gravel to country and will bring city people to make a good foundation. Cover with the fresh air. about two luches of morter made by | Did you ever hear this? "The roads mixing thoroughly while dry one part of good cement to three or four parts of sand and then wetting with water and mixing thoroughly,

Contagious Diseases of Animals

The great work being done by the jat a figure below the cost of produc-State Veterinarian, backed by the tion. State and national authorities, in contruffing and checking infectious discases of animals is gaining prominence and encouragement from stock have saultary codes that necessitate owners. They are demanding assat- the tuberculin testing of all dairy ance in wining out diseases, and are cattle supplying milk for human conever ready to take all precautions nocessary to avoid the introduction of disease into their herds. The stock owner is realizing that infectious diseases may be diagnosed, restrained, their hords free from tuberculosis. prevented and even eradicated by the intelligent use of reliable biological laboratory products, such as vaccines, leation la purely a public health bacterins, sura, toxina and antitoxins. and his understanding of these producta, together with their proper application has convinced him. Where is the stock man who would question the reliability of black leg vaccine to save his herd from black leg? This vaccine is used more than all others combined, and saves many young herds from complete destruction in black leg season.

The shippers of horses and mules are using bucterins and autitoxins en their horses and mules to prevent catarrhai fever or influenza, and they are lowering the mortality due to diseases incident to shipping. This ia a wonderful preventive and has cut the mortality in the St. Louis stock yards to 2 per cent, where before its universal use the loss was from 15 to 20 per cent.

The use of anti-hog choicrn serum ine established liself with the swine breeders. The loss from this disease nione would cover the deficit in the State Treasury. The demand for this serum is about four times the capaclty of the Experiment Station laborntory to produce it, in the past three years, qualified men have vaccinated a nominal price This work has netion. This work of stamping out cholrespective territories. The serum is disease and from cattle that bave furnished by the Experiment Station been tunberculin tested.

The eradication of bovine tuberenjosis is making headway. Many towns realize this source of danger and sumption. This was first inaugurated by the State Board of Health, and the dairymen and cattle owners now realize the importance of having

The law allows no indemnity for diseased cattle, and the problem of eradand public spirit problem. The owners are to be commended for the manner in which they have cleaned their herds of this disease, The United States Bureau of Animal

Industry recognizes this fact, and to firster and encourage the eradication of tuberculosis from the herds, has extended the services of experts, free to cattle owners, through the efforts of the State Board of Health and the Live Stock Sanitary Board, While the city of Lexington can rightly boast of n low bacterial count in their city milk supply, we must not everlook the dairles at Psducah, where every animal furnishing milk to consumers in that city was tuberculin tested for the owners, free of charge, by Government men. A total of approximntely 1,500 dairy cows were tested, and all diseased, as shown by the test, were slaughtered before the publle and owners, and every animal condemned proved on post mortem io be diseased. Such work can not help but have a great influence on all cattle owners and make them renitze the importance of keeping healthy cattle in their dairles. GOOD ROADS MAXIMS FOR YOUR CAMPAIGN.

Put the Netional Damand Into a Faw Wall Chesan Words.

The following good roads maxims have been prepared by au official of a highway across the coutinent, to be known as the ocean to ocean road: If you want to know if good roads

are a good thing ask a horse. Good roads promote prosperity; bad roads provoke profaulty.

In considering roads remember that there are few towns that look so good to the farmer that he will kill his horse to get there.

Was it in your township that the ignoramus pulled the and into the mid Good roads will increase health, hap-

piness, education, religiou and moral

Good roads will decrease profaulty. discoursgement, back taxes, sheriff's sales, sour grapes and grouches. Improved roads are a good trade

mark for any community, Good roads invoke a blessing upon any people who build them, Good roads will keep people in the

were so had that the only way be could get to town was by telephone." The good roads campaign is an old The good roads csuipaign is an old power of the people to utilize.—Better one, but there is such a thing sa putting old trulsus into such new form

as to make them take on meaning for the first time. Many un article has been advertised into fame and popularity by a cutchy phrose, while many a uian tins found his rejutitition estab fished or enhanced by a few words rightly joined. 'The man who can put the national cry for good roads into a few well chosen words which carry the "punch" with them and absolutely refuse to be forgotten will be deserving of as much praise when the campaign is at an end as nny man who goes out and actually performs the menual lebor in the highway.

BETTER ROADS WILL BOOST OUR INDUSTRIES.

Good Systam of Highways a Boon to Manufacturers, Large and Small.

The manufacturing ludustries will receive an increased business from the general stimulus of agriculture, indus try and commerce that will result from the building of a great system of atate roads. Many millions of dollars are invested in ailled industries that would receive both direct and indirect benefits from the expenditure of atsic funds for roads. A prosperous state can only be kept prosperous by its citizens investing in internal improvements that will best develop its natural resources. Good roads are recognized as the most potent agency for general prosperity that is within the

KENTUCKY GROWN

\$17,000,000 Spent Outside State Each Year.

SHOULD GROW THEM HERE.

Schools Ars Striving to Help Solve Problems That Will Confront Our Children-Ussless to Talk to Older Farmers-Boys' Corn Clubs Point Wey to Success.

It is estimated that there are 9,000,-000 sigde trees of hearing age in Kentucky at the present writing. Our annual crop from these trees is sometblng like 3,000,000 looshels of inferior quality. We spend \$17,000,000 for fruits of all kinds that could be grown in Kentucky,

It is useless to talk to many of the older farmers, for they will tell you:

ROOT GRAPTING.

"Ob, yes; when I was a boy you could raise all the fruit you wanted to. But now-wast, I reckon it's jus' run out." It must be the new generation with which we deal if we are to save this snnual expenditure of \$17,000,000 some time in the future. We cannot go out to every furmbanse in the state and have a chat with the farmer and his boys and girls, so we must find a

way to teach them easily and effectively. The floys' Corn clubs point the way to auccess. They have been made possible by the co-operation of teachers everywhere in the country, and the same is possible in fruit culture. At one of our normal schools numbers of the young people who are training for teachers are getting ready for this new crusade.

Almost any afternoon this suring in the basement of one of the big build ous ones will produce the most eggs. ings, tables littered with roots of young apple trees, twigs from stand ard varieties, thread, wired tags and knives might have been seen.

As rapidly as deft fingers out roots and twigs to fit snug, they were wound with thread and placed in small bundles. These bundles of ten, fif teen or twenty-five tiny trees were then home gardens of the pupil teachers and carefully cultivated for n year be fore being set out permanently.

That the luterest in this real vits. work of education is growing is shown by the fact that the number of trees

TWENTY-PIVE JONATHANS BEADY TO BENIC

mailed to the homes of the students this spring will be about five times us great us it was two years ago,

The first year the work was inaugurated 4,000 trees were grafted, last year 8,000 and this year about 20,000 will go on their mission of education.

With such work being done by teachers here and there over the state the children are sure to see a new vision of Kentucky as a fruit state.

"Yes, our new wagon's a Studebaker — the only kind we KNOW"

The Studebaker idea has been in our family for sixty years. We have never thought of buying any other kind of a wagon." 'It's true, we're continually being offered other

wagons costing a little less, with lots of promises as to what they will do. But we know in our family what a Studebaker will do. A few dollars difference in price doesn't mean much. It's the service a wagon gives that we conside most.

Long service for a fair price means more every time than short service for a few dollars less."

That's why we stick to Studebaker-and Stick to Stude-"That's why we stick to Studebaker—and 'Stick to Studebaker' is a pretty good motto for a man who uses wagons."
"Studebaker wagons are built of good stuff. They're made right by people who've had years and years of experience in making them right—people who are trusted the world over."
"Studebaker wagons last, because they're made to last."
"Look out for the dealer who tells you his wagon is just as good as a Studebaker. That's my advice after a good deal of experience—and the experience of all of my people. You get a Studebaker and you've got a safe investment."
